Skelton Truck Lines to be Given Award of Excellence in Environmental Initiatives

Toronto – Skelton Truck Lines Ltd. of Sharon, Ontario will be presented with an Award of Excellence in Environmental Initiatives at the 35th annual National Transportation Week Ontario Awards Breakfast (June 8 in Toronto).

Just over five years ago, Ron Skelton decided to do something to help the environment, as well as his company's bottom line. So he invested in a relatively new technology developed by another Ontario company (Canadian Hydrogen Energy Corporation) that promised to reduce harmful emissions and improve fuel efficiency and engine power.

The GlobalTech Hydrogen Fuel Injection System produces hydrogen on demand and injects it into the engine's air intake, which results in a more complete combustion of gases.

Today, all 20 of Skelton's trucks are equipped with this system, which amounts to at least a 10% savings in fuel for the company. And as emissions go, his 20 trucks in total reduce emissions by 750 tons per year.

The NTW award will be presented at 8:30 a.m. on June 8 at the Travelodge Hotel Toronto Yorkdale, 2737 Keele Street, North York (just north off the 401).

Attention Editors: A photo of this presentation will be available after the event.

- 30 -

Each year during National Transportation Week (NTW), Canadians recognize the hundreds of thousands of men and women who keep Canada moving safely, efficiently and reliably.

The Ontario NTW committee is made up of representatives from CAA Ontario, GO Transit, Ontario Motor Coach Association, Ontario School Bus Association, Ontario Trucking Association and Toronto Transit Commission. For thirty-five years this committee has been promoting the importance of transportation to the Ontario economy.
